

HYGIENIC BATHROOM SOLUTIONS

Parryware, launched Verve anti-microbial range of water closets and touchless faucets, designed to minimise the growth of microorganisms or

bacteria on the product surface and enhance safety in

bathroom spaces. The new range of Parryware products is layered with a special additive of Nano Silver ion glaze to reduce the bacteria, virus growth and minimize germ and infection

spread. Addressing a common concern around hygiene in times of pandemic, Parryware touchless advanced technology sensor taps are built-in with an auto open-close feature, easy to install, energy-efficient and offers cost-effectiveness as it runs on a battery that can be mounted on any existing basin. These sensor taps come in six contemporary and elegant designs created to limit hand contact with its touch-free sensor technology.
